

AERObag®

Manual Resuscitators and Masks | -accessories
Hyperventilation Mask

AERObag®

Silicone | PVC Manual Resuscitators

AERObag® - Resuscitators

Reusable silicone- and single use PVC resuscitators for adults (1500 ml), children (450 ml) and infants (280ml) in transparent design.

powerful, user- and patient friendly construction

High-quality raw material

- All parts latexfree
- Disinfectable, autoclavable up to 134°C, gas sterilizable (silicone version)
- Robust: ready for use under toughest environmental conditions

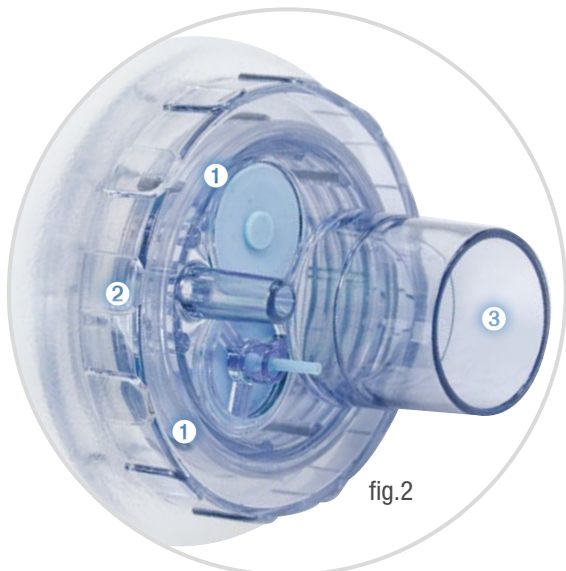

Hygienic and transparent

- Contamination easy to detect
- Easy to clean

High ease of use

- Comfortable „grip“ and safe hold
- Rotatable patient connection
- Pressure relief valve 60 mbar - adults (fig. 1) or 40 mbar - children and infants
- Can be folded to save storage space

All-In-One Intake Valve

intake valve (integrated reservoir valve)

fig.1

pressure relief valve

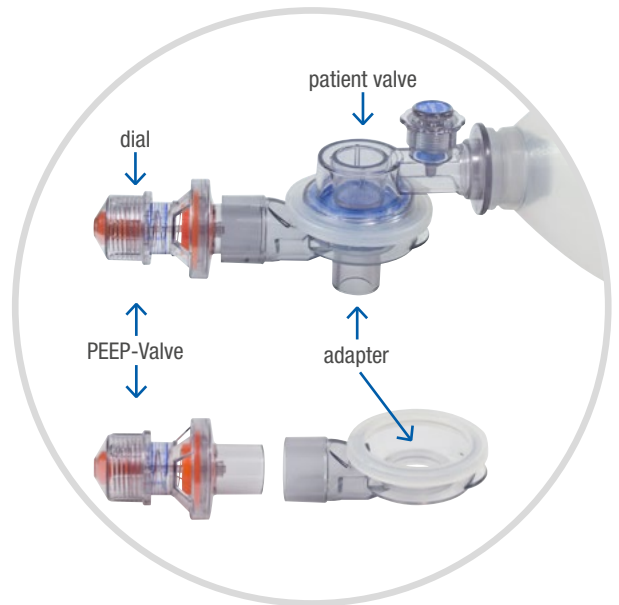

Exact fit

- Connections according to ISO 5356
- Masks, tubings and filters can be connected
- Innovative All-In-One Intake-Valve (fig. 2)
→ integrated Reservoir valve ①
- Oxygen gas inlet for 6 mm tubing ②
- Conic plug – 25.6 mm outer diameter / 21.7 mm inner diameter:
 - Direct connection for reservoir bag
 - Connection of demand valves respectively bag-refill systems with 22 mm OD connector is possible by means of a separate adapter ③

2 different Resuscitator types in 3 different sizes (adults | children | infants)

Silicone Resuscitator (reusable / autoclavable)

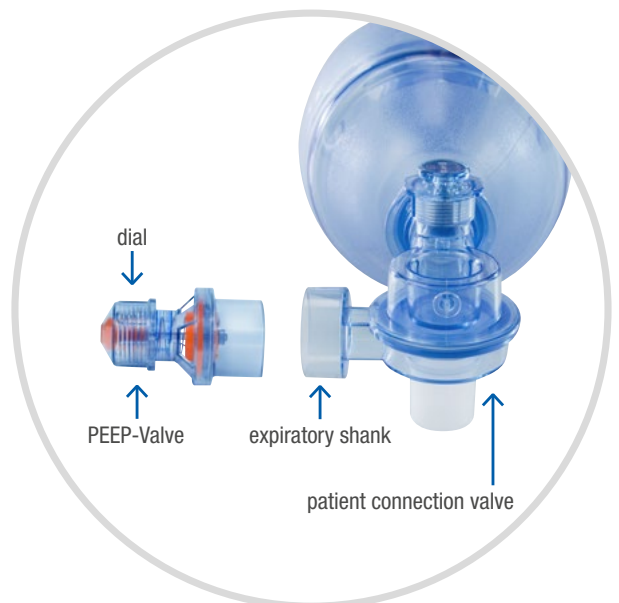

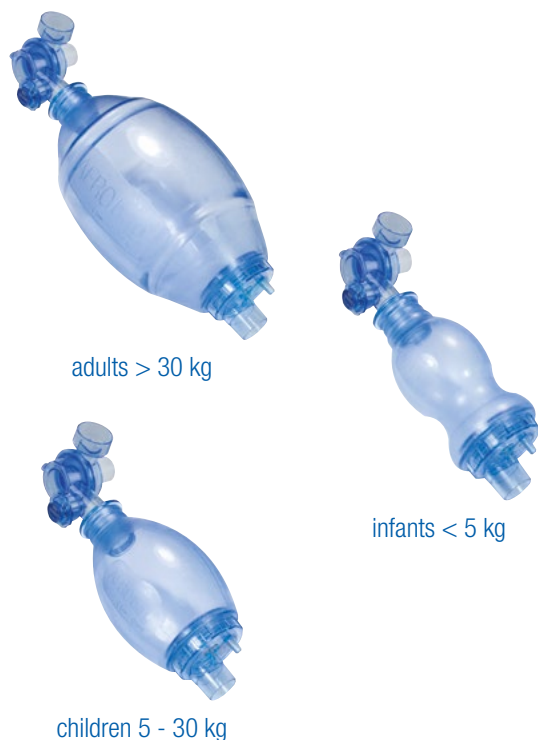

Optional connection possibility for PEEP Valves with the help of an additional adapter/diverter (HBB05-DV).

PVC Resuscitator (single use / disposable)

Patient connection valve with integrated expiratory shank

Optional, direct connection possibility for PEEP Valves at integrated expiratory shank

AERObag®

Resuscitation Masks and Accessories

AERObag® - Resuscitation Masks

Reusable silicone- and single use PVC resuscitation masks.

Transparent, anatomically shaped with excellent sealing at already low pressure.

Different mask sizes for adults, children and infants.

4 different mask types

Silicone (reusable / autoclavable)

- Mask with silicone cuff and a clear rigid shell of polysulfone
- Sizes 3-5

cuff

Full silicone (reusable / autoclavable)

- With integrated silicone cuff
- Sizes 0-5

cuff

PVC (single use / disposable)

- Masks with inflatable cuff (with valve) and clear rigid shell of PVC
- Color coded fixing hook of PE (for fixing strip)
- 6 sizes:

- 0
- 1
- 2
- 3
- 4
- 5

valve

PVC with silicone valve | MRI-safe (single use / disposable)

silicone valve

Accessories for Resuscitation Masks

AERObag® - Inflator/Deflator

Small, handy inflation/deflation bag for adjustment of resuscitation mask cuff volumes.

Advantages

- Quick Inflation and deflation of cuffs
- Comfortable grip and easy handling
- Simple „One-Hand“ usage
- Included loop
- Ready to use in toughest emergency environments

Spezifikationen

- PVC. latexfree
- Dimensions: 7.9 cm x 4.2 cm
- Colour: blue
- Weight: approx. 22.5 g

single use / disposable

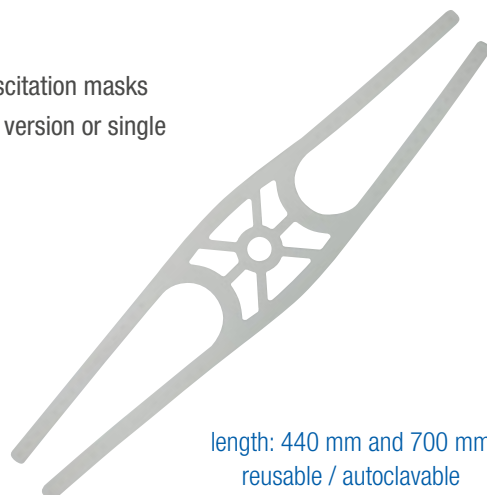

reusable / autoclavable

Fixation hooks

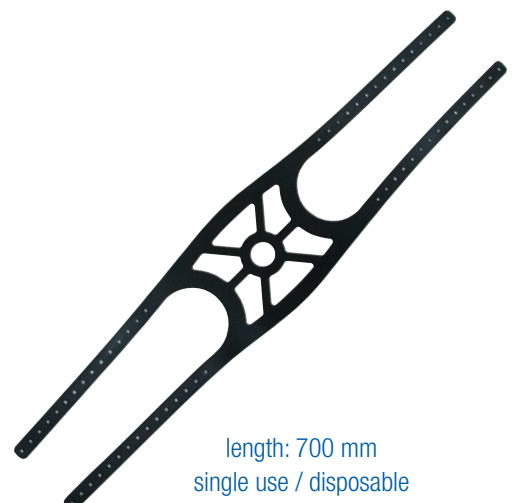

Headstrap fixation hooks available in autoclavable polysulfon version or single use polyethylen version.

Mask Head Straps

For head fixation of AERObag® resuscitation masks available in reusable silicone (white) version or single use rubber (black) version.

length: 440 mm and 700 mm
reusable / autoclavable

length: 700 mm
single use / disposable

AERObag®

Accessories for Resuscitators | Resuscitator-Sets Hyperventilation Mask

Accessories for Resuscitators

AERObag® - PEEP-Valves

Improvement in oxygenation at varied disturbances of pulmonary function.
All PEEP valves are equipped with 2 adapters with the dimensions 22 mm OD and 30 mm ID.
They can be attached either to the patient valve via diverter/adapter or for HBB06-...2 models directly at the expiratory shank.

Reusable / autoclavable

Material: Polysulfone (PSF)

- PEEP valve 10 mbar - continuously adjustable 2 cm H₂O - 10 cm H₂O
- PEEP valve 10 mbar - continuously adjustable 5 cm H₂O - 20 cm H₂O

Single use / disposable

Material: Polycarbonate (PC)

- PEEP valve 10 mbar - continuously adjustable 2 cm H₂O - 10 cm H₂O
- PEEP valve 10 mbar - continuously adjustable 5 cm H₂O - 20 cm H₂O

Adapter (Diverter)

Adapter (Diverter)

Only for previous PVC Manual Resuscitator models

Reservoir Bag

2500 ml or 600 ml of PVC or PE. Ideal for an additional oxygenation during resuscitation.

Hand Straps

Hand straps of silicone or PVC. Additional comfort and constant compression during resuscitation.

Storage Box

Easy storage and accessibility.

Suitable for all AERObag® models incl. accessories.

- Transparent plastic (PP)
- Hinged handle
- Large storage space dimensions
(W x H x D): 340 x 145 x 135 mm

AERObag® - Resuscitator-Sets

PVC- and Silicone-Resuscitator-Sets for adults, children and infants. A complete solution for emergency resuscitation. Set consisting of: Resuscitator, mask(s), reservoir bag, 2 m oxygen tubing.

customized configuration available upon request

AERObag® - Beatmungsbeutel
VV-BB05/06_a | Stand 18.09.2015 | Revision 5

AERObag® - Hyperventilation Mask (single use / disposable)

The hyperventilation mask is used for an optimal “therapy by rebreathing” to treat the hyperventilation syndrome.

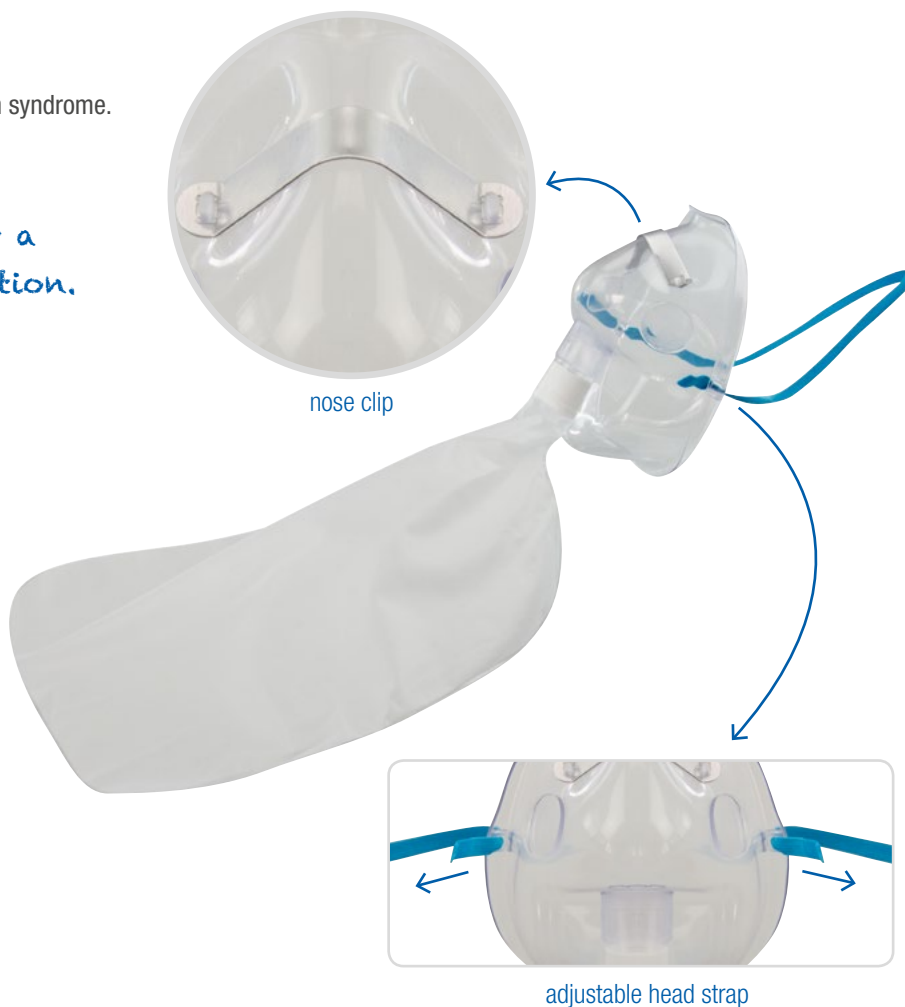

The inexpensive alternative for a quick help during hyperventilation.

Optimal “re-breathing therapy”

- Soft, well sealing mask
- Large volume re-breathing bag (2000 ml)

User and patient-friendly

- Anatomically contoured fit
- Adjustable head-strap
- Wide nose clip
- Transparent medical grade PVC

Product overview - Manual Resuscitators | Resuscitation Masks | PEEP Valves

AERObag® - Silicone - Manual Resuscitators

Item-No.	Description
HBB05-E	AERObag® - BB05-E, manual resuscitator, silicone, adults
HBB05-K	AERObag® - BB05-K, manual resuscitator, silicone, children
HBB05-B	AERObag® - BB05-B, manual resuscitator, silicone, infants

AERObag® - PVC - Manual Resuscitators

Item-No.	Description
HBB06-E2	AERObag® - BB06-E2, manual resuscitator, PVC, adults
HBB06-K2	AERObag® - BB06-K2, manual resuscitator, PVC, children
HBB06-B2	AERObag® - BB06-B2, manual resuscitator, PVC, infants

Spare Parts

Item-No.	Description
HBB05-RB600	AERObag® - RB05-600, reservoir bag 600 ml, PVC
HBB05-RB2500	AERObag® - RB05-2500, reservoir bag 2500 ml, PVC
HBB05-DV	AERObag® - DV05, Diverter / PEEP valve adapter, autoclavable
HSS11-2	AEROpact® - O ₂ -safety tubing, 2 m
HBB05-HS	AERObag® - HS05, hand strap, silicone
HPV05-10	AERObag® - PV05-10, PEEP valve, 2-10 cmH ₂ O, orange, PSF, autoclavable
HPV05-20	AERObag® - PV05-20, PEEP valve, 5-20 cmH ₂ O, blue, PSF, autoclavable
HBB05-AB	AERObag® - BB05-AB, storage box for manual resuscitators

Spare Parts

Item-No.	Description
HBB06-RB600	AERObag® - RB06-600, reservoir bag 600 ml, PE
HBB06-RB2500	AERObag® - RB06-2500, reservoir bag 2500 ml, PE
HBB06-DV30	AERObag® - DV06-30, diverter / PEEP valve adapter, disposable
HSS11-2	AEROpact® - O ₂ -safety tubing, 2 m
HBB06-HS	AERObag® - HS06, hand strap, PVC
HPV06-10	AERObag® - PV06-10, PEEP valve, 2-10 cmH ₂ O, orange, polycarbonate, disposable
HPV06-20	AERObag® - PV06-20, PEEP valve, 5-20 cmH ₂ O, blue, polycarbonate, disposable

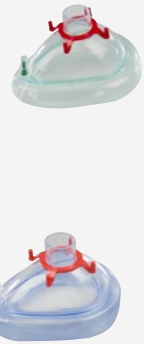

AERObag® - Silicone - Resuscitation Masks

Item-No.	Description
HBM05-5	AERObag® - BM05-5, silicone resuscitation mask, sz. 5
HBM05-4	AERObag® - BM05-4, silicone resuscitation mask, sz. 4
HBM05-3	AERObag® - BM05-3, silicone resuscitation mask, sz. 3
HBM05-5V	AERObag® - BM05-5V, full-silicone resuscitation mask, sz. 5
HBM05-4V	AERObag® - BM05-4V, full-silicone resuscitation mask, sz. 4
HBM05-3V	AERObag® - BM05-3V, full-silicone resuscitation mask, sz. 3
HBM05-2V	AERObag® - BM05-2V, full-silicone resuscitation mask, sz. 2
HBM05-1V	AERObag® - BM05-1V, full-silicone resuscitation mask, sz. 1
HBM05-0V	AERObag® - BM05-0V, full-silicone resuscitation mask, sz. 0

AERObag® - PVC - Resuscitation Masks

Item-No.	Description
HBM06-5VS	AERObag® - BM06-5VS, PVC resuscitation mask with silicone valve, sz. 5
HBM06-4VS	AERObag® - BM06-4VS, PVC resuscitation mask with silicone valve, sz. 4
HBM06-3VS	AERObag® - BM06-3VS, PVC resuscitation mask with silicone valve, sz. 3
HBM06-2VS	AERObag® - BM06-2VS, PVC resuscitation mask with silicone valve, sz. 2
HBM06-1VS	AERObag® - BM06-1VS, PVC resuscitation mask with silicone valve, sz. 1
HBM06-0VS	AERObag® - BM06-0VS, PVC resuscitation mask with silicone valve, sz. 0
HBM06-5V	AERObag® - BM06-5V, PVC resuscitation mask with valve, sz. 5
HBM06-4V	AERObag® - BM06-4V, PVC resuscitation mask with valve, sz. 4
HBM06-3V	AERObag® - BM06-3V, PVC resuscitation mask with valve, sz. 3
HBM06-2V	AERObag® - BM06-2V, PVC resuscitation mask with valve, sz. 2
HBM06-1V	AERObag® - BM06-1V, PVC resuscitation mask with valve, sz. 1
HBM06-0V	AERObag® - BM06-0V, PVC resuscitation mask with valve, sz. 0

AERObag® - Mask Accessories

HBM01-ID	AERObag® - inflator/deflator
HBM05-BH	AERObag® - BM05-BH, fixation hook, polysulfon, autoclavable, transparent
HBM06-BH	AERObag® - BM06-BH, fixation hook, polyethylen, disposable, blue
HBM05-B440	AERObag® - BM05-B440, mask head strap, 440 mm, white, Silicone
HBM05-B700	AERObag® - BM05-B700, mask head strap, 700 mm, white, Silicone
HBM06-B700	AERObag® - BM06-B700, mask head strap, 700 mm, black, rubber

AERObag® - Hyperventilation Mask

HBM06-HV2000E	AERObag® - BM06-HV2000E, PVC-hyperventilation mask
